

Dave:

I wanted to personally thank you for helping to coordinate the repair of the damaged conduit at our Hunter Lab Project.

I especially want to note the performance of two K-Electric employees throughout the repair. Corey Fontaine and Joe Simon were extraordinary under pressure and did an excellent job representing your expertise and company.

Painstakingly methodical, safe, thorough, communicative and easy to work with, does not go far enough to describe their performance in what turned out to be a couple of really long nights this past weekend. It was a pleasure to work with them. At some point, we can talk and I can go into more detail

Please extend this note of appreciation to both Corey and Joe for me.

Thank you
