To Whom It May Concern:

I am writing this letter on behalf of K Electric in Warwick, RI. I have worked with K Electric over the last 7 years and during that time have done multiple projects with them.

The projects that we have been involved in have been complex and the team at K Electric did an outstanding job. The projects included electrical design and installation, structural design and installation and electrical controls.

I highly recommend K Electric for any type of electrical project and feel comfortable with using them in many different types of projects.

I have a great deal of confidence that any future projects that we are involved in will be handled with the utmost integrity and a high level of customer service.

If you have any questions please feel to contact me to discuss further.

Sincerely,

Andrew J. Dyjak,

Musco Sports Lighting
